No. 212.

The 22nd October 1874.

The following Extract from the Proceedings of the Bombay Government is published for the purpose stated in the 1st para of the Resolution of that Government.

"By Order," H. WELLESLEY, Offg. Secretary.

Extract from the Proceedings of the Government of Bombay in the Revenue Department, No. 5330, dated 7th October 1874.

READ the following papers:

Letter from Colonel H. W. Holland, Commissary General, To the Secretary to Government, in the Military Department, No. 78-3789, dated 28th August 1874.

I have the honor to forward for the information of His Excellency the Governor in Council, and for such action as may be deemed necessary, letters from the Superintendent, Government Cattle Farm, Allignum, Nos. 78—285 and 78—287, dated 18th and 21st instant, (with accompaniment,) on a parasite which annually attacks so many sheep all over the country.

2. A phial containing a few of the parasites has been sent by post.

Letter from Lieut.-Colonel J. F. Berthon, Superintendent, Government Cattle Farm, To the

I have the honor to forward a report from Inspecting Vetericary Surgeon F. F. Collins, concerning the parasite which annually causes so many deaths among the Government sheep, and indeed among flocks all over the country.

- 2. I am greatly indebted to Mr. Collins for the trouble he has taken in investigating this subject, for, up to the present time, I have been totally at a loss to account for so many very sudden deaths among the sheep, although I had personally made hundreds of post mortem examinations, and also forwarded many carcases to Poona the last two or three years for the same purpose.
- 3. This most serious disease affects the sheep more or less all the year round, perhaps more severely in the rainy season, when grass is abundant. The first symptom is a distressing discharge at the nostrils which becomes more and more glutinous, until the sheep very often breathes with the greatest difficulty. The grubs are then supposed to have arrived at maturity, and drop out on the earth, forming a chrysalis. If not, the sheep dies. At present, at least eighty per cent of all sheep are afflicted with the disorder, and I believe that about fifty per cent are never free from it.
